

Sectional tubes

Made in Germany

Product general information

Sectional tubes are manufactured from round, extruded or drawn tubes.

1.Operation

Max. tensile strength: up to 600 N/mm²

2.Product applications

- In electronic industry
- In plumbing industry
- In the manufacture of musical and writing instruments
- In medical technology
- In automotive technology

3.Product benefits

- ✓ Uniform wall thickness (Suitable for pressure gauges)
- ✓ Low weight
- ✓ Can be produced in complex structures
- ✓ Appropriate mechanical strength
- ✓ Cost-effective

4.Material designations

Sectional tubes are manufactured from copper materials, lead-free brass, bronze and nickel silver.
