

GEWA-B evaporator tubes

Made in Germany

Product general information

GEWA-B tubes are enhanced nucleate boiling tubes for shell-and-tube heat exchangers.

1. Product applications

- Used in shell-and-Tube
- In Packaged chillers
- In refrigeration industry
- In air-conditioning industry

2. Product benefits

- ✓ Increased heat transfer on the shell and tube side
- ✓ Advanced overall heat transfer performance
- ✓ Substantial reduction of heat exchanger size and refrigerant charge
- ✓ Significant improvement in life cycle and energy efficiency

3. Product types

- GEWA-B5 & B6: For highest performance and efficiency
- GEWA-B4HSL: Weight optimized
- GEWA-BHV: For media with high viscosities
- GEWA-BLF/BPL: For high fouling applications

4. Material designations

These tubes are available in Copper, Copper-Nickel, Steel, Stainless Steel and Titanium.
